Summary

Frontend MERN Stack Developer with hands-on industry experience in developing modern, scalable, and user-centric web applications. Experienced in React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB, with a strong focus on clean architecture, performance, and responsive design. Recognized for delivering production-ready solutions, quickly adapting to new technologies, and maintaining high standards of code quality and user experience.

Experience

Front-End Developer, CCJK Technologies March-03-2025 - October-30-2025

- Developed responsive and high-performance web interfaces using HTML5, CSS3, Bootstrap, JavaScript, and React.js.
- Collaborated with cross-functional teams to enhance UI/UX and ensure cross-browser compatibility.
- Participated in project planning, code reviews, and agile development processes to deliver scalable solutions.
- Tools Used: HTML5, CSS3, Bootstrap 5, JavaScript, React.js

Web-Development, Coding Caliber November-17-2025 - February-16-2026

- Developed and maintained responsive, production-ready web applications using React.js, Next.js, and TypeScript.
- Implemented pixel-perfect UI designs from Figma and ensured seamless user experience across devices.
- Integrated PostgreSQL for data management and backend interactions, ensuring robust application performance.
- Successfully deployed a live production website, optimizing for performance, responsiveness, and real-world usage.
- Tools Used: React.js, Next.js, TypeScript, PostgreSQL, Tailwind css, Figma.

MERN Stack Developer, ZNZ Technologies March-29-2026 - Present

- Developing a full-stack E-Commerce web application using MongoDB, Express.js, React.js, and Node.js.
- Building responsive frontend interfaces and implementing backend APIs, authentication, database management, and order processing features.
- Managing the complete development lifecycle independently, from UI design and development to backend architecture and deployment.

Education

University of Management and Technology (UMT), BS in Computer Science Oct 2020 – Sept 2024

Punjab Group of Colleges (PGC), FSc. Pre Engineering Aug 2018 – March 2020

Projects

Hostel Management Website github.com/zaibijt/Hostel-s-Hub

- Developed a hostel management website with features like add/view hostel, room management, customer dashboard, reviews, ratings, chat-bot, online payment, and map integration
- Tools Used: React.js and Node.js, incorporating AI

Financial Tracker – Full Stack Application

/github.com/zaibijt/financialtrackers

- Developed a full-stack financial tracker using React (Vite), TypeScript, and TailwindCSS for the frontend,

integrated with Clerk for user authentication. Implemented RESTful APIs using Express.js and MongoDB for storing and managing financial records securely. Features include user login/signup, add/update/delete transactions, and responsive UI for mobile and desktop.

- Tools Used: React (Vite), TypeScript, TailwindCSS, Clerk Authentication, Express.js, MongoDB, Axios.

E-Commerce Website

/github.com/zaibijt/E-Commerce

- Designed and developed a full-stack e-commerce platform (ZNZShop) with a database-driven admin panel, implementing role-based access control (RBAC) to differentiate Super Admin and Staff Manager permissions at both route and UI level. Built a real-data analytics dashboard with backend-calculated monthly revenue, top products, and customer segmentation, along with a complete order management system featuring status-based stock synchronization via Prisma transactions. Developed a customer reviews system, size-based product variants with per-variant pricing, and a real-time notifications system with live UI updates. Centralized API configuration and conducted local network testing across multiple devices to simulate real-world multi-client usage.
- **Tools Used:** React (Vite), Node.js, Express.js, PostgreSQL, Prisma ORM, Axios, REST APIs, Multer.

The Worklane – Corporate Website

/theworklane.com

- Designed and developed a modern, fully responsive corporate website using Next.js and TypeScript with TailwindCSS, ensuring clean UI components and optimal performance across all devices.
- Implemented a validated contact form with backend email integration, allowing form submissions to be sent directly via email. Successfully deployed the project as a live production website with all links fully functional and responsive.
- **Tools Used:** Next.js, TypeScript, TailwindCSS, React, Form Validation, Backend Email Integration, Responsive Design.

Personal:Portfolio-Website

/github.com/zaibijt/Portfolio

- Designed and developed a fully responsive, modern personal portfolio website to showcase my skills, projects, and professional experience as a Frontend MERN Stack Developer. The website features animated UI elements, a dynamic project showcase, testimonials, and a functional contact form with real-time email integration. Built with a component-based architecture for scalability and optimized for both desktop and mobile devices, and deployed live via GitHub Pages.
- **Tools Used:** React.js, Vite, Tailwind CSS, JavaScript (ES6+), EmailJS, Lucide Icons, GitHub Pages.

Frontpage:Marshub Website

/github.com/zaibijt/Marshub

- I developed a fully responsive landing page for Marshub using HTML5, CSS3, Bootstrap 5, and JavaScript. The project features a clean, modern layout with a grid-based service section and smooth adaptability across various screen sizes. I focused on creating a user-friendly interface with optimized performance and consistent design on both desktop and mobile devices. The structure is clean and maintainable, making it suitable for future scalability and enhancements.”
- Tools Used: HTML,CSS,Bootstrap5

Frontpage: Door2Teck Website

github.com/zaibijt/door2teck

- I developed a fully responsive landing page for Door2Teck using HTML5, CSS3, Bootstrap 5, and JavaScript. The website features a clean, modern layout with a strong focus on mobile responsiveness, smooth navigation, and an engaging user experience. It highlights various services and incorporates an intuitive design optimized for both performance and scalability.
- Tools Used: HTML, CSS, Bootstrap 5, JavaScript

Skills

Front-End: HTML5, CSS3, JavaScript, TypeScript, Bootstrap 5, Tailwind CSS, React.js, Next.js

Back-End: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, PostgreSQL

Design Tools: Figma

Soft Skill: Problem-solving, Documentation, Communication

Interests

Front-End Frameworks: Learning and working with frameworks like React.js ,Next.js and Angular

Back-End Development: Currently learning backend development using .NET and C to build scalable and secure applications.

Web Performance Optimizing websites for faster load times and better user experiences

Responsive Design Designing websites that adapt seamlessly to various devices and screen sizes.
